1 Executive summary

General

The HFSP Board of Trustees approved the following awards for 2024:

- 34 Research Grants out of a total of 711 eligible Letters of Intent and 100 Full Proposals (34%). Of those awarded, 25 were Research Grants-Program and 9 were Research Grants-Early Career. The success rate of HFSP Research Grants in 2024: 4.8%
- 59 Postdoctoral Fellowships out of a total of 535 Letters of Intent and 107 Full Proposals (55%). Of those awarded, 48 were Long-Term Fellowships and 11 were Cross-Disciplinary Fellowships. The success rate of HFSP Fellowships in 2024: 11%

Japan

With awards starting in 2024, HFSP will support:

- Six Japan based scientists who are involved in 23 out of the 34 HFSP Research Grants awarded in 2024. Two scientists are principal investigators of a Research Grants-Early Career team. Four scientists were awarded Research Grants-Program, as co-investigators.
- Seven Japanese scientists who were awarded Long-Term Fellowships and one Japanese scientist who was awarded a Cross-Disciplinary Fellowship. They will work in Austria, France, Germany and the USA.

For awards in previous years, see *Chapter 4 Japan 1990-2024*

2 Introduction to HFSP programs

The International Human Frontier Science Program Organization (HFSP) funds an international program of research support for frontier research on the complex mechanisms of living organisms through the Human Frontier Science Program (HFSP). Research is funded at all levels of biological complexity from biomolecules to the interactions between organisms.

Key elements of HFSP's mission are to support innovative, cutting edge research at the frontiers of the life sciences, to encourage high risk research, to promote international collaboration in the spirit of science without borders, and to support early career researchers.

HFSP schemes are highly competitive, but also highly prestigious. This prestige, together with the fact that the schemes provide researchers with unique opportunities to work collaboratively across all countries and disciplines, attracts many outstanding applications each year.

HFSP Research Grants (Research Grants-Program and Research Grants-Early Career) provide 3 years of support for international teams involving at least two countries. Preference is given to intercontinental collaborations (rather than all N. American or all European teams). All team members are expected to broaden the character of their research compared to their ongoing research programs and interact with teams bringing expertise that is very different from their own so as to create novel approaches to problems in fundamental biology. All members of a Research-Grant Early Career team must be within 5 years of establishing their independent research group and no more than 10 years from their doctoral degree. Research Grant-Program teams may consist of team members at any stage of their career as independent investigators. Each grant is an award to at least two researchers from different countries. Furthermore, HFSP expects that by creating new exchanges, these international interactions will lead to innovative projects.

There is a single annual competition for HFSP Research Grants and a full description of the review process is available at:

https://www.hfsp.org/funding/hfsp-funding/research-grants#review_procedures

HFSP Fellowships support innovative, ground-breaking projects that have the potential to advance knowledge in the applicants' field of study or open a new approach to a research problem. High risk research is supported.

Long-Term Fellowships support applicants with a degree in the life science to obtain training in a new area of research in an outstanding laboratory of their choice in another country. *Cross-Disciplinary Fellowships* are intended for postdoctoral fellows with a degree outside the life sciences (e.g. physical sciences, chemistry, mathematics, engineering or computer sciences) who wish to receive training in biology. HFSP Fellows receive 3 years of support to obtain training in an outstanding laboratory of their choice in another country. The annual competition for HFSP Fellowship awards is explained in detail at <http://www.hfsp.org/funding/postdoctoral-fellowships>.

3 Awards in 2024 for Japan

HFSP support provided to Japanese and non-Japanese scientists working in Japanese laboratories, and Japanese scientists working abroad.

3.1. Overview

Research Grants

Number of grants awarded to leaders of international teams working in Japan (principal investigators):

Research Grants-Early Career	2
-------------------------------------	----------

Scientists working in Japan who will collaborate in HFSP international research teams (co-investigators):

Research Grants-Program	4
--------------------------------	----------

Fellowships

Number of fellowships awarded to Japanese applicants:

Long-Term Fellowships	7
------------------------------	----------

Cross-Disciplinary Fellowships	1
---------------------------------------	----------

3.2 Research Grants 2024

Grants awarded to leaders of international teams working in Japan (principal investigators)

Research Grants-Early Career

HUSNIK Filip
(Czech Republic)

Okinawa Institute of Science and
Technology Graduate University
Onna-son, Okinawa

Deciphering the evolution, cellular
biology and biogeochemistry of
symbioses in anaerobic eukaryotes

TAKEMATA Naomichi

Dept. of Synthetic Chemistry and
Biological Chemistry
Kyoto University

A tale of tails – reconstructing
evolutionary transition between
archaeal and eukaryotic chromatin

Scientists working in Japan who will collaborate in HFSP international research teams (co-investigators)

Research Grants-Program

PI: ENTCHEVA Emilia, USA

SATO Moritoshi

Dept. of Life Sciences
The University of Tokyo

Optogenetic control of organelle
“chatter” and effects on calcium
dynamics in human cardiomyocytes

PI: FISCHER Matthias, Germany

OGATA Hiroyuki

Institute for Chemical Research
Kyoto University, Uji Campus

Mechanisms and origins of
glycosylation in giant viruses

PI: GAUDIN Raphael, France

IKEUCHI Yoshiho

Institute of Industrial Science
The University of Tokyo

Deciphering the Impact of Viral
Infections on Human
Neurocognitive Functions ex vivo

PI: SCHAPIRO Igor, Israel (Germany)

KATO Hideaki

Dept. of Life Sciences
The University of Tokyo

UV opsin as the sensor for
magneto-sensation in animals

3.3 Fellowships 2024

Fellowships awarded to Japanese applicants

Long-Term Fellowships

CHIBA Kosuke Japan	From	Osaka University Osaka Japan	<i>Targeted epigenome editing using induced proximity-based small molecules</i>
	To	University of California, Berkeley Berkeley USA	Supervisor: NOMURA Daniel
NAGANO Masahiro Japan	From	Kyoto University Kyoto Japan	<i>Dissecting long-range gene regulation of cell differentiation through biophysical approaches</i>
	To	Massachusetts Institute of Technology Cambridge USA	Supervisor: HANSEN Anders
NAITOU Yuki Japan	From	Kyushu University Fukuoka Japan	<i>Visualizing specific lipid processing and uncovering molecular mechanisms using gut organoids</i>
	To	TU Dresden Dresden Germany	Supervisor: HONIGMANN Alf
NAKAHASHI Ayuno Japan	From	Université de Montréal Montréal Canada	<i>Closing the neural and behavioural feedback loop of social interactions in freely- behaving primates</i>
	To	Deutsches Primatenzentrum GmbH Göttingen Germany	Supervisor: GAIL Alexander

NOGUCHI Asako Japan	From	The University of Tokyo Tokyo Japan	<i>Memory trace in a neuron: dissecting dendritic mechanisms of learning</i>
	To	Columbia University New York USA	Supervisor: LOSONCZY Attila
OKAMOTO Hiroyuki Japan	From	The University of Tokyo Tokyo Japan	<i>Illuminating orphan GPCR signaling by novel biochemical approaches</i>
	To	University of California, San Francisco San Francisco USA	Supervisor: MANGLIK Aashish
YOSHIDA Mari Japan	From	Nagoya University Nagoya Japan	<i>A nucleus-driven paradigm of mechanotransduction and morphogenesis</i>
	To	Institut Curie Paris France	Supervisor: BELLAÏCHE Yohanns

Cross-Disciplinary Fellowships

HIDAKA Takuya Japan	From	Kyoto University Kyoto Japan	<i>Molecular mechanism of sister chromatid resolution in replicated human chromosomes</i>
	To	Institute of Molecular Biotechnology Vienna Austria	Supervisor: GERLICH Daniel

4 Japan 1990-2024

This section summarizes Japan's involvement in HFSP funded research projects in 2024 and integrates a historical perspective with running totals over the last 10 years.

4.1 HFSP Research Grants

The table below lists the number of Japanese based scientists at the Letter of Intent (LI) stage and those scientists who participated in a Full Proposal. The data shown in the table express the status at the time of submitting the application to HFSP. Scientists may have moved their laboratory to a in the years after receiving HFSP support.

	Letters of Intent (LI)		Full Proposals (FP)		Awardees (AW)	
Year	All team members	Japan based scientists	All team members	Japan based scientists	All team members	Japan based scientists
1990-2014	28944*	2206	17891+	2101	3607	443
2015	3092	185	252	16	98	5
2016	2604	142	272	13	100	4
2017	3208	173	252	20	98	7
2018	2321	127	251	18	102	6
2019	2394	146	268	11	105	6
2020	2051	139	256	16	86	6
2021	2062	132	292	22	94	5
2022	2032	96	206	10	100	4
2023	1672	89	247	15	107	10
2024	1978	107	313	16	108	6
Total	52358	3542	20500	2258	4605	502

*there were no Letters of Intent in the application process before 2001

+ for 1990/91, there is no information available on the number of applicants

The table below lists the number of teams including Japan based scientists in the last 10 years.

	Letters of Intent (LI)	Full Proposals (FP)	Awardees (AW)	Success rate based on LIs (%)	Success rate based on FPs (%)	Total Awarded teams
Year	Teams with member (s) in Japan	Teams with member (s) in Japan	Teams with member (s) in Japan			
2015	174	15	5	2.9	33.3	31
2016	132	13	4	3.0	30.8	32
2017	161	21	7	4.3	33.3	30
2018	117	19	6	5.1	31.6	31
2019	136	11	6	4.4	54.5	34
2020	131	16	6	4.6	37.5	28
2021	124	22	5	4.0	22.7	28
2022	93	10	4	4.3	40	32
2023	89	15	10	11.2	66.7	34
2024	103	16	6	5.8	37.5	34

4.2 HFSP Postdoctoral Fellowships

The table below shows the number of fellowship applications reviewed and awards granted to Japanese applicants and the number of fellowships applied for and carried out in Japan.

Award year	Japanese fellowship applicants	Total applicants	Japanese fellowship awardees	Total awards	Japan as proposed host country by fellowship applicants	Japan as host country of HFSP fellows
1990-2014*	1,816	16,150	409	2,844	107	17
2015	48	788	6	75	10	
2016	39	697	5	75	6	
2017	32	776	4	72	8	
2018	35	588	3	90	9	1
2019	32	580	5	82	5	1
2020	32	544	3	65	11	1
2021	28	665	2	56	10	1
2022	20	493	4	65	6	
2023	31	429	3	50	6	
2024**	36	535	8	59	2	
Total	2,149	22,245	452	3,533	180	21

* The number of candidates from and to Japan for award year 1990 to 1992 is not available.

** The figures for 2024 reflect the awards approved by the Board of Trustees in March 2024 and may be subject to change.

5 International distribution of 2024 awards

As last year, this section shows tabular breakdown according to country (location of laboratory), nationality and host country (of HFSP fellowship holders) for 2024 Awards.

In addition, this year, new figures present a country comparison for the complete record and the last 10 years of HFSP awards for MSP and a separate presentation for the awardees in or from European countries.

5.1 Research Grants 2024

34 grants were awarded (25 Research Grants-Program and 9 Research Grants-Early Career). Each grant is an award to at least two researchers from different countries. The Principal Investigator is responsible for submitting the application and coordinating the collaboration.

The countries in which the 34 Principal Investigators and the 74 co-applicants work are shown in Table I, together with the total number of applications. Their nationalities are shown in Table II.
