1 Executive summary

General

The HFSP Board of Trustees approved the following awards for 2024:

- 34 Research Grants out of a total of 711 eligible Letters of Intent and 100 Full Proposals (34%). Of those awarded, 25 were Research Grants-Program and 9 were Research Grants-Early Career. The success rate of HFSP Research Grants in 2024: 4.8%
- 59 Postdoctoral Fellowships out of a total of 535 Letters of Intent and 107 Full Proposals (55%). Of those awarded, 48 were Long-Term Fellowships and 11 were Cross-Disciplinary Fellowships. The success rate of HFSP Fellowships in 2024: 11%

United Kingdom

With awards starting in 2024, HFSP will support:

- Eighteen UK based scientists who are involved in 17 out of the 34 HFSP Research Grants awarded in 2024. Six scientists are Research Grants-Early Career team members, of which four are principal-investigators. Twelve scientists were awarded Research Grants-Program, of which three are principal investigators.
- One British scientist who was awarded a Long-Term Fellowship. He will work in the USA.
- Six Long-Term Fellows who will work in research institutions in the United Kingdom.

For awards in previous years, see *Chapter 4 United Kingdom 1990-2024*

2 Introduction to HFSP programs

The International Human Frontier Science Program Organization (HFSP) funds an international program of research support for frontier research on the complex mechanisms of living organisms through the Human Frontier Science Program (HFSP). Research is funded at all levels of biological complexity from biomolecules to the interactions between organisms.

Key elements of HFSP's mission are to support innovative, cutting edge research at the frontiers of the life sciences, to encourage high risk research, to promote international collaboration in the spirit of science without borders, and to support early career researchers.

HFSP schemes are highly competitive, but also highly prestigious. This prestige, together with the fact that the schemes provide researchers with unique opportunities to work collaboratively across all countries and disciplines, attracts many outstanding applications each year.

HFSP Research Grants (Research Grants-Program and Research Grants-Early Career) provide 3 years of support for international teams involving at least two countries. Preference is given to intercontinental collaborations (rather than all N. American or all European teams). All team members are expected to broaden the character of their research compared to their ongoing research programs and interact with teams bringing expertise that is very different from their own so as to create novel approaches to problems in fundamental biology. All members of a Research-Grant Early Career team must be within 5 years of establishing their independent research group and no more than 10 years from their doctoral degree. Research Grant-Program teams may consist of team members at any stage of their career as independent investigators. Each grant is an award to at least two researchers from different countries. Furthermore, HFSP expects that by creating new exchanges, these international interactions will lead to innovative projects.

There is a single annual competition for HFSP Research Grants and a full description of the review process is available at:

https://www.hfsp.org/funding/hfsp-funding/research-grants#review_procedures

HFSP Fellowships support innovative, ground-breaking projects that have the potential to advance knowledge in the applicants' field of study or open a new approach to a research problem. High risk research is supported.

Long-Term Fellowships support applicants with a degree in the life science to obtain training in a new area of research in an outstanding laboratory of their choice in another country. *Cross-Disciplinary Fellowships* are intended for postdoctoral fellows with a degree outside the life sciences (e.g. physical sciences, chemistry, mathematics, engineering or computer sciences) who wish to receive training in biology. HFSP Fellows receive 3 years of support to obtain training in an outstanding laboratory of their choice in another country. The annual competition for HFSP Fellowship awards is explained in detail at <http://www.hfsp.org/funding/postdoctoral-fellowships>.

3 Awards in 2024 for the United Kingdom

HFSP support provided to UK and non-UK scientists working in UK laboratories, and UK scientists working abroad.

3.1. Overview

Research Grants

Number of grants awarded to leaders of international teams working in the United Kingdom (principal investigators):

Research Grants-Program 3

Research Grants-Early Career 4

Scientists working in the United Kingdom who will collaborate in HFSP international research teams (co-investigators):

Research Grants-Program 9

Research Grants-Early Career 2

Fellowships

Number of fellowships awarded to UK applicants:

Long-Term Fellowships 1

Number of fellowships awarded to foreign scientists who wish to work in the United Kingdom:

Long-Term Fellowships 6

3.2 Research Grants 2024

Grants awarded to leaders of international teams working in the United Kingdom (principal investigators)

Research Grants-Program

CASTRILLO Gabriel (Spain)	Plant Sciences building. School of Biosciences University of Nottingham	3D-bioprinting meets machine learning: a novel tool to decipher the determinants of viral tropism.
DI GIOVANNI Simone (Italy)	Dept. of Brain Sciences Imperial College of Science, Technology and Medicine London	Cross-talk between the skin microbiome, immunity and sensory innervation in neurophysiology
MALIK Ashish (India)	School of Biological Sciences University of Aberdeen	Scaling the impact of viruses from single cells to the global methane cycle

Research Grants-Early Career

BISHOP Tom	Dept. of Organisms and Environment Cardiff University	Quantifying the 4-dimensional microenvironment to explain the coexistence of social insects
CREIXELL Pau (Spain)	CRUK Cambridge Institute University of Cambridge	Resurrecting the Multiple Origins of Tyrosine Kinase Activity and Phosphotyrosine Recognition
DUNNING Luke	School of Biosciences University of Sheffield	S3: Securing shifting sands – from genes to geoengineering
MONGERA Alessandro (Italy)	Dept. of Cell and Developmental Biology University College London	Mechanical control of hidden embryonic boundaries

Scientists working in the United Kingdom who will collaborate in HFSP international research teams (co-investigators)

Research Grants-Program

<i>PI: BELTRAO Pedro, Switzerland</i> FUGGER Kasper (Denmark)	Dept Cancer Biology UCL Cancer Institute London	Discovering the chemical space of bioactive modified nucleotides and their enzymatic repertoire
<i>PI: BUSCH Karin, Germany</i> TOMKINSON Nicholas	Dept. of Pure and Applied Chemistry University of Strathclyde Glasgow	Deciphering the role of ion distribution in mitochondria for long-term memory formation

PI: CLEAVES Henderson, USA

MCMAHON Sean

School of Physics and Astronomy

3.3 Fellowships 2024

Fellowships awarded to UK applicants

Long-Term Fellowships

SUTHERLAND Emmajay UK	From	University of St Andrews St Andrews UK	<i>Chemical glycobiology to investigate the cell surface glycocode</i>
	To	University of Washington Seattle USA	Supervisor: RILEY Nicholas

Fellowships awarded to foreign scientists who wish to work in the United Kingdom

Long-Term Fellowships

DUFVA Olli Finland	From	University of Helsinki Helsinki Finland	<i>Deciphering genomic determinants of immunity in tumour organoid models at single-cell resolution</i>
	To	Wellcome Sanger Institute Cambridge UK	Supervisor: GARNETT Mathew
HERSH Taylor USA	From	Dalhousie University Nova Scotia Canada	<i>Vocal communication and the evolution of hyper-cooperative societies</i>
	To	University of Bristol Bristol UK	Supervisor: KING Stephanie

LEPRINCE Erwan France	From	Aix-Marseille University Marseille France	<i>Role of visual and emotion circuits in shaping neural spatial representations of aversive stimuli</i>
	To	University of Cambridge Cambridge UK	Supervisor: BELTRAMO Riccardo
REINERT Sandra Germany	From	Ludwig-Maximilians-Universität München Munich Germany	<i>Understanding the formation of schema representations in prefrontal cortex</i>
	To	University College London London UK	Supervisors: BEHRENS Timothy MRSIC-FLOGEL Thomas
WANG Lu-Yi Taiwan	From	The University of Melbourne Melbourne Australia	<i>Adhesive mechanism of poison frog tadpoles: how to attach on soft and wet surfaces</i>
	To	University of Cambridge Cambridge UK	Supervisor: FEDERLE Walter
XU Jin China	From	Zhejiang University Hangzhou China	<i>Exploring novel riboswitches in plants: uncovering new regulatory mechanisms for plant metabolism</i>
	To	John Innes Centre Norwich UK	Supervisor: DING Yiliang

4 United Kingdom 1990-2024

This section summarizes United Kingdom's involvement in HFSPO funded research projects in 2024 and integrates a historical perspective with running totals over the last 10 years.

4.1 HFSP Research Grants

The table below lists the number of UK based scientists at the Letter of Intent (LI) stage and those scientists who participated in a Full Proposal. The data shown in the table express the status at the time of submitting the application to HFSP. Scientists may have moved their laboratory to a different country in the years after receiving HFSPO support.

	Letters of Intent (LI)		Full Proposals (FP)		Awardees (AW)	
Year	All team members	UK based scientists	All team members	UK based scientists	Total Awarded	UK based Awardees
1990-2014	28944*	2803	17891+	1859	3607	413
2015	3092	291	252	28	98	12
2016	2604	211	272	30	100	8
2017	3208	302	252	34	98	10
2018	2321	201	251	16	102	5
2019	2394	216	268	34	105	11
2020	2051	179	256	25	86	11
2021	2062	187	292	32	94	12
2022	2032	165	206	21	100	14
2023	1672	143	247	21	107	9
2024	1978	168	313	40	108	18
Total	52358	4866	20500	2140	4605	523

*there were no Letters of Intent in the application process before 2001

+ for 1990/91, there is no information available on the number of applicants

The table below lists the number of teams including UK based scientists in the last 10 years.

	Letters of Intent (LI)	Full Proposals (FP)	Awardees (AW)	Success rate based on Lis (%)	Success rate based on FPs (%)	Total Awarded teams
Year	Teams with member (s) in UK	Teams with member (s) in UK	Teams with member (s) in UK			
2015	257	23	10	3,9	43,5	31
2016	188	28	8	4,3	28,6	32
2017	268	33	10	3,7	30,3	30
2018	178	19	5	2,8	26,3	31
2019	198	30	9	4,5	30,0	34
2020	164	25	10	6,1	40,0	28
2021	170	31	11	6,5	35,5	28
2022	161	21	14	8,7	66,7	32
2023	140	19	8	5,7	42,1	34
2024	161	38	17	10,6	44,7	34

4.2 HFSP Postdoctoral Fellowships

The table below shows the number of fellowship applications reviewed and awards granted to UK applicants and the number of fellowships applied for and carried out in the United Kingdom.

Award year	British fellowship applicants	Total applicants	British fellowship awardees	Total awards	The UK as proposed host country by fellowship applicants	The UK as host country of HFSP fellows
1990-2014*	816	16,150	159	2,844	1,887	318
2015	20	788	4	75	102	5
2016	19	697	2	75	86	5
2017	17	776	1	72	91	6
2018	13	588	1	90	58	4
2019	14	580	4	82	55	7
2020	20	544	4	65	47	6
2021	21	665		56	76	9
2022	17	493	5	65	60	9
2023	7	429		50	51	8
2024**	12	535	1	59	68	6
Total	976	22,245	181	3,533	2,581	383

* The number of candidates from and to the United Kingdom for award year 1990 to 1992 is not available.

** The figures for 2024 reflect the awards approved by the Board of Trustees in March 2024 and may be subject to change.

5 International distribution of 2024 awards

As last year, this section shows tabular breakdown according to country (location of laboratory), nationality and host country (of HFSP fellowship holders) for 2024 Awards.

In addition, this year, new figures present a country comparison for the complete record and the last 10 years of HFSP awards for MSP and a separate presentation for the awardees in or from European countries.

5.1 Research Grants 2024

34 grants were awarded (25 Research Grants-Program and 9 Research Grants-Early Career). Each grant is an award to at least two researchers from different countries. The Principal Investigator is responsible for submitting the application and coordinating the collaboration.

The countries in which the 34 Principal Investigators and the 74 co-applicants work are shown in Table I, together with the total number of applications. Their nationalities are shown in Table II.
