

The EU Framework Programme for Research and Innovation

**HORIZON 2020**

**Data resources in the life sciences: perspective from the European Commission**

**Philippe Cupers, PhD**  
**Health Directorate**

DG Research & Innovation  
European Commission

# Databases: challenges for policy makers

# Business models for EU support to databases

**1. EU infrastructures for bio-medical research**  
12 ESFRI + coordination (BioMedbridges – CORBEL)

**3. Multilateral initiatives**  
Global strategies for global health challenges

**2. Large-scale research projects**

- Human Brain Project
- Public-Private Partnership projects (IMI2): eTRICKS, BD4BO

**4. European Open Science Cloud**

# 1. EU infrastructures for bio-medical research

 BioMedBridges

 CORBEL

BioMedBridges and CORBEL provide technical bridges to allow data integration in the biological, medical, translational and clinical domains

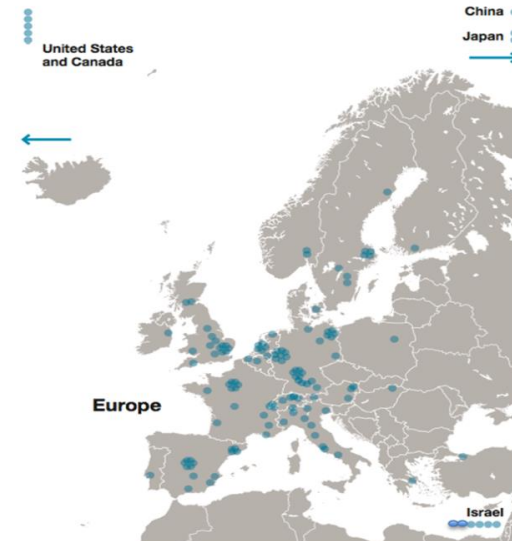

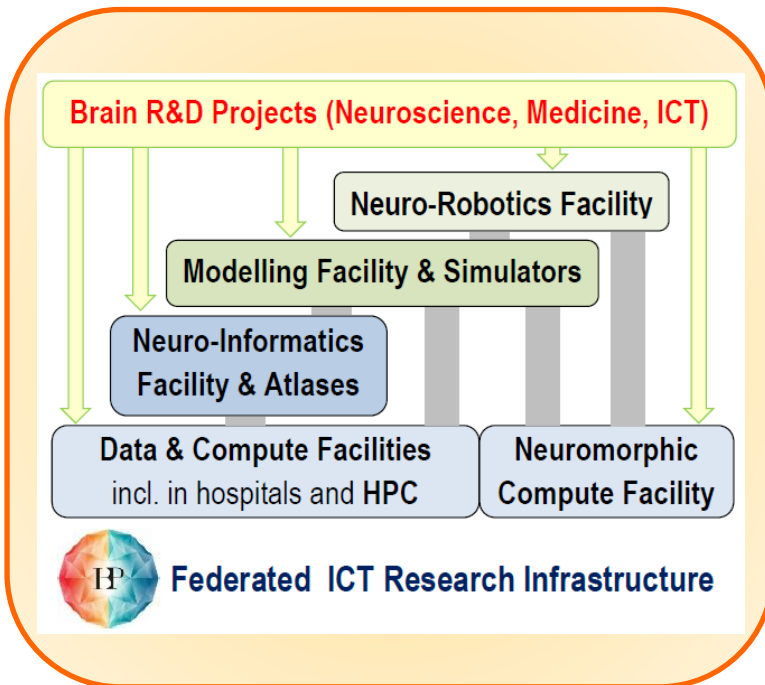

# 2. Large-scale research projects: HBP

## Human Brain Project

A federated ICT infrastructure for the neuroscientists to collect, share, integrate and model data about the brain for understanding the functioning of the human brain and its diseases

- A very large-scale European collaborative research initiative: More than 400 scientists from 112 institutions from 24 countries
- A 10 years Research Roadmap, 1 B€ budget
- Ramp-up phase (FP7): 1<sup>st</sup> October 2013 to 31<sup>st</sup> March 2016 – 54 M€ EU funding
- Operational phase (H2020): 01 April 2016 to 2020+: ~50 M€ EU funding/year

# 3. Multilateral research initiatives

## International Epigenome Consortium

### Welcome to the IHEC Data Portal

You may select IHEC datasets in these charts to view them in the Data Grid. Alternatively you can download or display them in a Genome Browser.

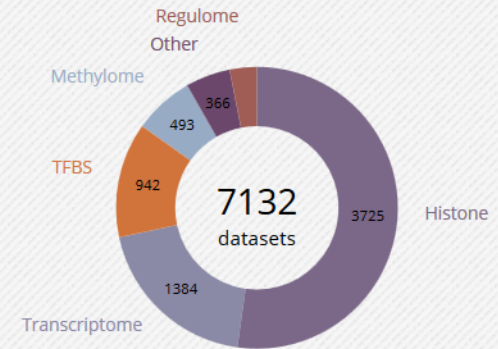

Genome :

By Consortium

By Tissue

By Assay Category

# 4. European Open Science Cloud

- It will provide 1.7 million EU researchers an environment with free, open services for data storage, management, analysis and re-use across disciplines
- The cloud will federate existing and emerging horizontal and thematic data infrastructures, effectively bridging today's fragmentation and ad-hoc solutions
- It will add value (scale, data-driven science, inter-disciplinarity, data to knowledge to innovation) and leverage current and past infrastructure investment (10 billion per year by EU Member States, two decades EU investment)
- Governance is a key issue

# HORIZON 2020

**Thank you  
for your attention**
